

V- 1	THERMAL IMAGERY	ENG Version	ECO TITCHFIELD - GREENING CAMPAIGN					
RA - Nov 2024								
	November 2024 - Apr 2025							
No / ID	Description	Risk	Scale	Mitigation	Scale after Mitigation			
1	Understanding which house to call upon	Eco Titchfield readability in the community if not professional		Use the street co-ordinator knowledge and work from the Google spreadsheet of ONLY those that have signed the forms				
2	Photography is only done on cold dark evenings	Volunteers become cold, plus operation is next to or into roads		Camera operator wears hi vis and never goes in the road. Minimum number of people involved - Camera plus street co-ordinator. Be aware of cold				
3	Entering peoples houses	This is not allowed under our protocol even if invited in to get to the rear of the house etc		Follow the protocol and only take images where access follows the Protocol				
4	Dogs in gardens	Protocol states no dogs to be in gardens		Ask before entering a garden to check protocol has been followed				
5	Trip Hazards	It is dark so trip hazards are an issue		Take torch with Camera operator and ask street co-ordinator to have a torch				
6	Village disruption	Time limits for operators and village disruption		We will only work on images up to 2200, preferably starting at 1900. Just be aware of onset of cold				
7	Professionalism	Impact on the long term Eco Titchfield project		All volunteers to be courteous, polite and use clear guidelines. (aim is to send the photos to the e mail on the completed form within 24 hours together with an explanation booklet)
